## Experience

Web Consultancy Services | Frontend Developer Intern

May 2024 - August 2024

Collaborated with Figma Designers to create a responsive, smooth, beautiful, fast & optimized websites for clients. In my span of this recent opportunity I've learned to structure & plan a project proficiently, hence **reduce time** for development & **less bugs production**.

## Personal Projects

Trello Clone | [Live Link](#)

March 2024 - April 2024

Trello Clone in Next.js using Typescript, where a user can create tasks, choose status & also add images. You can drag & drop tasks in other statuses & change their order.

Ecommerce Website | [Live Link](#)

October 2023 - October 2023

E commerce website in Next.js, where you can add or remove items in your cart, then you can head to the checkout page where you can make a payment using **Stripe Payment Gateway**.

ChatApp In React, Google Firebase | [Live Link](#)

July 2023 - July 2023

Chat app with authentication, create & login functionality with the ability to chat with text & send images to other users. Image upload uses **image optimization library** to reduce the image size & saves the bandwidth & **reduces the download time**.
