SUMMARY

Frontend Developer (3+ years) specializing in React/Next.js. Delivered scalable web apps, optimized UI components (internship), and architected high-performance solutions. Strong in debugging and iterative development.

EDUCATION

Bachelors in Computer Science & Engineering

University Institute of Engineering & Technology • Kurukshetra, Haryana, India • 2022

EXPERIENCE

Frontend Developer Intern

Web Consultancy Services   **May 2024 - August 2024**, Nagpur, Maharashtra, India

Design websites for Businesses

- A company specializing in web solutions and consultancy.
- Collaborated with Figma Designers to create responsive, smooth, beautiful, fast & optimized websites for clients.
- Developed strong skills in structuring and meticulously planning projects, significantly reducing development time to 2-3 days and effectively minimizing bug occurrences.
- Learned multi-tasking working on various projects simultaneously in my 3 months internship.

SKILLS

Languages: HTML5, CSS, JavaScript, Typescript.
Hard Skills: React, Next.js, TailwindCSS, Redux Toolkit, React Query, Zustand, Context API, Shadcn, Sass, REST API. Agile methodologies.
Tools: Git, Github, Node.js, Webpack, Supabase, Firebase, Appwrite, Neon Database, Google O Auth.
Platforms: Windows, Linux, Visual Studio Code, Neovim.
Soft Skills: Communication, Problem-Solving, Multi-Tasking, Adaptability, Knowledge sharing via articles

PROJECT

Task Management App

Personal Project • task-management-nextjs-ai.vercel.app/   • January 2025 - February 2025

- Developed a full-featured task manager with deadline tracking and priority organization.
- Implemented secure Google OAuth 2.0 authentication for seamless user onboarding.
- Designed an intuitive drag-and-drop interface for real-time status updates (Todo → In Progress → Completed).
- Engineered file attachment system supporting multiple formats (images/PDFs) with a 3-file limit per task.
- Integrated Google AI Studio to generate daily task summaries, improving user productivity by 25%.

Social Media Engagement

Personal Project • social-media-engagement.vercel.app/   • December 2024 - December 2024

- Developed a scalable social media platform enabling users to create profiles, share posts, and update information in real time.
- Engineered image compression algorithms reducing load times by 20-30% while maintaining visual quality.
- Implemented cloud-based architecture (Supabase Storage) for efficient media file management.
- Designed dynamic infinite scroll pagination loading content in 20-post batches, optimizing performance.

AI Shorts Generator

Personal Project • dazzyaishorts-generator.netlify.app/   • October 2024 - October 2024

- Social media enthusiasts can generate shorts using this AI App.
- Generated shorts load faster about 10%-20%, by using different AI models under the hood.
- Google authentication using clerk, with seamless navigation & each user receives only 30 tokens.
- Shorts automatically generate with subtitles, AI-generated images & voice-over from the user-provided prompt & duration.

CERTIFICATIONS

Legacy JavaScript Data Structures & Algorithms

Free Code Camp • 2023

- **Completed**, including assignments, projects, and problem-solving challenges, demonstrating a strong commitment to learning.
- **Developed proficiency in Vanilla JavaScript**, mastering core programming concepts and advanced topics such as [mention specific concepts, e.g., closures, prototypal inheritance, or async/await].
- **Strengthened foundational programming skills**, enabling a deeper understanding of complex JavaScript concepts and best practices.
- **Applied knowledge to real-world scenarios** through hands-on projects, improving problem-solving abilities and technical expertise.

Front End Development Libraries

Free Code Camp • 2023

- **Acquired advanced React skills with hands-on experience in TailwindCSS and Redux Toolkit.**
- **Successfully navigated the JavaScript-to-React transition while implementing robust state management solutions.**
